

9 October 2025 v4.0
Approved for external use
Document ID: **DH-4183:2025**

These technical specifications enable developers to connect applications to the My Health Record system via the FHIR® Gateway. They describe API requests and responses, data mapping between CDA implementation guide fields and Fast Healthcare Interoperability Resources (FHIR®), and the error scenarios and associated error codes for all APIs. It is intended for use by FHIR® API consumers to understand the API signature exposed by the My Health Record system and the 'my health App'.

Change to existing viewing delay period for Pathology Reports on the My Health Record to enable consumers to quickly access and view their reports with minimal or no delay. All relevant supporting documents have updated to reflect the changes.

none

Updated (supersedes previous version)

No change

Identifier	Name and version
DH-4021:2024	My Health Record FHIR Gateway – Error Mapping v3.0
DH-4020:2024	My Health Record FHIR Gateway – Data Mapping v3.0

Removed (archived or withdrawn)

None.

Scope

Scope includes API specification editorial update to the following documents published for the developers to refer to.

1. My Health Record FHIR Gateway – API Specification v4.0

Stakeholders

The following stakeholders have been involved in the development of this release:

- Australian Digital Health Agency
- My Health Record National Infrastructure Operator

Audience

These documents are available to software vendors developing My Health Record-enabled products.

Capabilities

No change
