# My Health Record Release 26.1.0

## Vendor Release Notes – Production Environment

10 March 2026 Version: 1.0.0  
Approved for external use

### Production Deployment Schedule

My Health Record Release 26.1.0 will be deployed into the My Health Record Production environment on **Thursday 5 March 2026**. All functionality of the Production environment will remain available.

### Summary of Changes

Release 26.1.0 of the My Health Record system is focused on delivering functional and security updates. This includes:

- Pathology and diagnostic imaging table solution and diagnostic imaging delay rule change
- Defects
- Problem fixes

### Pathology and diagnostic imaging table solution and diagnostic imaging delay rule change

The purpose of this work package is to enhance My Health Record pathology and diagnostic imaging table solution and diagnostic imaging delay management. With this work package, the 7-day delay will be removed for X-rays for limbs (arms and legs and when examination does not include other body regions, or another type of imaging). For other X-rays and types of diagnostic imaging reports (like CT scans, mammograms, MRI and PET scans, and ultrasounds) the 7-day delay will be reduced to 5 days.

There will be UI updates in the National Provider Portal and National Consumer Portal to align with the rule changes. Performance improvements across pathology tests will also be implemented. Note: the same performance improvements will be implemented for diagnostic imaging tests as well but will not be in use.

### Defects

There are no vendor system related defects being addressed as part of Release 26.1.0.

## **Problem Fixes**

Problem fixes being delivered as part of Release 26.1.0 will have no impact on vendors.
