# My Health Record Release 26.4.0
# Vendor Release Notes – Software Vendor Production Environment

13 November 2026 Version 1.0.0
Approved for external use

## Production Deployment Schedule

My Health Record Release 26.4.0 will be deployed into the My Health Record Production environment on **Thursday 3 December 2026 between 7:00 AM – 9:30 PM AEDT**. All functionality of the Production environment will remain available.

## Summary of Changes

Release 26.4.0 of the My Health Record system is focused on delivering functional and security updates. This includes:

- MedsView Electronic Discharge Summary (EDS) Enhancement
- Patches
- Problem fixes

### MedsView Electronic Discharge Summary (EDS) Enhancement

The purpose of this work package is to improve the medicines data availability within MedsView in the National Consumer Portal (NCP), National Provider Portal (NPP) and Business-to-Business (B2B) gateway to help clinicians improve their clinical decision making. When MedsView is filtered by latest discharge summary, medicines information can now be sourced from additional discharge summary documents where the latest discharge summary does not contain structured medicines data or the required medicines information. Where appropriate, medicines information may also be sourced from discharge summary narrative content. The MedsView user interface has been updated to align with the revised business and display rules.

## Patches

As part of Release 26.4.0, patches will be deployed to maintain the security posture of the My Health Record system. The patch release notes from Oracle do not suggest that there will be any impact to vendors. However, there is still a risk that these patches may impact how vendors interact with the My Health Record system.

## Problem Fixes

Problem fixes being delivered as part of Release 26.4.0 will have no impact on vendors.
